

## **SUWADA NAIL NIPPERS INFORMATION**

### **BENEFIT**

#### **Wouldn't think of using of anything else anymore!!**

1. Our nail nipper is the best cutting quality of most budget nippers and leaves a smooth edge that means no filing necessary.
2. Our unique nail-fitting curve maximizes safety and ease of use even for tough nails and ingrown nails.
3. The cutting quality of our nail nipper last for a long time because of the high strength steel by forging.
4. Our nail nipper can be used for thick nails because of widely opened blade by use of cylinder spring.
5. The sharp blade makes it possible for cutting without effort.

### **General Care**

Our products are made of high-carbon steel or stainless steel so they may become rusty when in a humid or wet environment. In order to protect the metal from corrosion, wipe the surface with a soft cloth and apply a coat of oil after each use. In addition, putting a little lubricant on the rivet joint will help with smooth movement.

### **Caution when using**

If you touch the blade, you may hurt yourself. Please pay great attention when handling the item.

Please keep our product inside its case when not in use and away from children.

Please do not over grip or use to pry something as this may damage the product then it will be transformed.

Please read carefully the general care note about rust.

The blade will open widely to cut even deformed nails. Please pay attention not to touch the blade.

Please do not try to sterilize by steam or do not use thinner or alcohol.
